

PRESS RELEASE

24 May 2011

DÜRR new shareholder of AGRAMKOW Fluid Systems A/S.

DÜRR has through Schenck today acquired 55% of the shares in AGRAMKOW Fluid Systems A/S with effect from 1st January 2011. The seller is primarily Industri Udvikling A/S, which has been a shareholder since 1999. Industri Udvikling A/S is a private equity fund primarily owned by Danish pension funds. The remaining 45% of the shares in AGRAMKOW Fluid Systems A/S are still owned by CEO Christian Cordsen Nielsen.

DÜRR is a world leader in filling equipment for the Automotive Industry and generated sales in 2010 within this segment approximately 30 million Euros. DÜRR wants to develop this area outside the Automotive Industry; therefore AGRAMKOW's position in Appliance fits perfectly into the strategy. Together the two companies will become the largest player in the filling and testing in both Appliance and Automotive with about 300 employees worldwide and a turnover of 50 million Euros.

AGRAMKOW will continue with the current management and own brand based out of Sønderborg. AGRAMKOW will continue as an independent company as today and future development of the company will happen in close cooperation with the new owner. Especially in China assessed significant expansion opportunities, since DÜRR has a strong platform in China and India among others.

DÜRR is a German company listed on the German stock market with a turnover of 1.26 billion Euros. DÜRR consists of 48 locations in 21 countries and employs 5900 globally.
